Simply the Best
Ideal For All Point-of-Use Water Heating Applications

Stiebel Eltron DHC Classic tankless electric water heaters are the ideal choice for all point-of-use hand washing applications:

Commercial › Industrial › Institutional

› Office buildings
› Stores
› Malls
› Warehouses
› Restaurants

› Gas stations
› Schools
› Hotels/Motels
› Commercial condominiums
› Manufacturing facilities

Residential

› Bathroom sinks
› Kitchen sinks
› Laundry areas
› Cabins/cottages

Stiebel Eltron DHC Classic tankless water heaters are designed for installation at the point-of-use. The DHC heats water instantaneously as it flows through the unit. Stand-by heat losses are completely eliminated.

The heating element is controlled by a flow switch which means a DHC Classic can never dry-fire and fail prematurely. And since all DHC Classics are hydraulically controlled, operation is quiet. DHC Classic water heaters are equipped with a safety high-limit with manual reset. The rugged all copper design ensures many years of reliable service.

DHC 3-1, DHC 3-2, and DHC 4-2 Classic models are shipped with 0.5 GPM pressure compensating flow reducer/aerators that fit on most faucets. Flow controls and faucet aerators are highly recommended in conjunction with tankless water heaters. No pressure relief valve, drains, or circulating pumps needed.

Depend on them!

› Exclusive copper-clad heating element
› Hydraulically controlled for virtually silent operation
› Never dry fires and fails prematurely
› Superior reliability

Engineer’s Specifications: The tankless electric water heater shall be equipped with a copper sheathed heating element housed in a copper cylinder. The flow switch that operates the heating element shall be of the mechanical pressure differential type. The unit shall be equipped with a safety high-limit switch with manual reset. An integral tamper-proof flow adjustment screw shall be provided for the installer so that water flow rates can easily be adjusted. The water connections shall be designed for ½” NPT female adapter. The housing shall be made of high impact polycarbonate plastic.
# DHC Classic Single Sink Sizing Guide

This guide shows possible point-of-use fixture or fixtures for use with each DHC. It is not intended for whole house sizing. Use actual achievable flow rates to determine if a particular model and size will deliver the temperature and flow rate required for the installed fixture.

### FIXTURES & FLOW RATES

**SINGLE LAV SINK** (Range 0.5-1.5)
- 90°F

**KITCHEN SINK** (Range 1.0-2.2)
- 120°F

**UTILITY/JANITOR’S SINK** (Range 1.0-2.2)
- 120°F

Recommendations for 240 V models are correct if installed with 240 V service. Increase one model size if unit will be installed with 208 V service.

Call Stiebel Eltron at 800.582.8423 if you have any sizing questions, or if you have any out-of-the-ordinary situation. Stiebel Eltron service representatives can make recommendations on sizing, or provide assistance with our water heaters, to both homeowners and professional installers.
