Location:	Date Required:							
Contractor:			Phone:					
Water Heater Specifications	Item No.	Quantity	kW	Voltage	Amperage			
Model # Mini™								

Applications

Commercial > Industrial > Institutional

- Office Buildings
- Gas StationsSchools
- StoresMalls
- > Hotels / Motels
- > Warehouses
- > Commercial Condominiums
- > Restaurants
- > Manufacturing Facilities

Residential

- > Bathroom Sinks
- > Kitchen Sinks
- > Laundry Areas
- > Cabins / Cottages
- > Low Flow Showers

Mini[™]-E is a code-compliant thermostatic model with electronically controlled output temperature.

- > Mounts with water connections up or down
- > Can be mounted above or below fixture

Warranty

Residential & commercial warranty: Stiebel Eltron, Inc. warrants to the original owner that the Mini™ tankless electric water heater will be free from defects in workmanship and materials for a period of three (3) years from the date of purchase, and free from leakage for a period of ten (10) years from the date of purchase. Should the part(s) prove to be defective under normal use during this period, Stiebel Eltron, Inc. will be responsible for replacement of the defective part(s) only. Stiebel Eltron, Inc. is not responsible for labor charges to remove and/or replace the defective part(s), or any incidential or consequential expenses.

Should the owner wish to return the tankless electric water heater for repair, the owner must first secure written authorization from Stiebel Eltron, Inc. The owner shall be required to show proof of purchase date, and to pay all transportation costs to return the defective part(s) or tankless electric water heater for repair or replacement. Warranty is void if water heater has been installed or used improperly or if design has been altered in any way.

ev. 11.2024 Due to our continuous process of engineering and technological advancement, specifications may change without notice

Mini™ 2-1 is internally restricted to 0.32 GPM / 1.2 l/min. Mini™-E 2-1 is internally restricted to 0.40 GPM / 1.5 l/min.

Mini™ 2-1, 2.5-1, 3-1 & Mini™-E 2-1, 3-1 ship with a 0.5 GPM pressure compensating flow-reducer/aerator that must be installed.

Mini™ 3.5-1, 4-2 & Mini™-E 4-2 ship with a 0.66 GPM pressure compensating flow-reducer/aerator that must be installed.

Mini™ 6-2 ships with a 1.0 GPM pressure compensating flow-reducer/aerator that must be installed.

Mini™-E 6-2 ships with two 0.5 GPM pressure compensating flow-reducer/aerators that must be installed, plus an additional 1.0 GPM pressure compensating flow-reducer/aerator for use if plumbed to 1 sink.

These are our recommendations. Check local codes for compliance if necessary.

Temp. rise above incoming water temp. (°F) $(GPM = kW \times 6.83 / \Delta t)$

Temp. rise above incoming water temp. (°C)

¹ Nominal mains voltage is 110-120V and 220-240V.

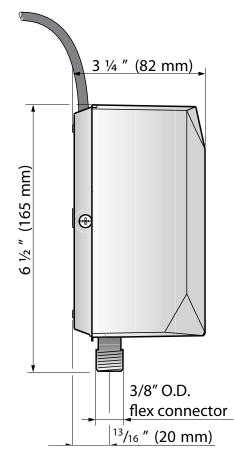

² Overcurrent protection sized at 100% of load. Tankless water heaters are considered a non-continuous load.

³ Copper must be used. Conductors should be sized to maintain a voltage drop of less than 3% under load.

⁴ Mechanical units suitable for supply with cold water only. Thermostatic units can accept inlet water of 122°F.

⁵ Do not connect to a salt-regenerated water softener or a water supply of salt water.

Conforms to UL Std. 499

Mini™:

Certified to CAN/CSA Std.

C22.2 No. 60335-1, E60335-2-35

Mini™-E:

Certified to CAN/CSA Std. C22.2 No. 64
